

APPROVED WASTE LOCATION LIST

In the interest of improving efficiency and providing more clear and timely communication of discharge approval status, Spartanburg Water has created this web-accessible page containing a listing of currently approved waste locations not covered by the general approvals for residential septic tanks within Spartanburg County and grease traps within the Spartanburg Sanitary Sewer District service area.

Spartanburg Water approves the waste from specific locations to be discharged at the Fairforest Reclaimed Water Treatment Facility, not the transporter carrying the waste. If the location is listed as approved, it is approved for any qualified transporter.

Spartanburg Water makes every effort to assure that the list is accurate as of the date listed, and will update the list as new information becomes available. If your location is not covered by one of the general approvals and does not appear on the list, please contact us before discharging.

Septic Tanks

Any residential septic tanks within Spartanburg County may be discharged at the Fairforest Reclaimed Water Treatment Facility. Case by case approval for each residential load is not required.

Any non-residential septic tank load requires prior approval from Spartanburg Water (Spartanburg Sanitary Sewer District) to discharge at the Fairforest Reclaimed Water Treatment Facility.

The list below includes all currently approved non-residential septic tank locations. Approvals are good for three (3) years from the date of approval. If the location you plan to pump is listed, and the expiration date for that location has not passed, you do not need to request approval again. If your location is NOT listed or the expiration date has passed, you must contact Spartanburg Water for approval prior to discharging.

Grease Traps

The Spartanburg Sanitary Sewer District will secure monitoring for all in-ground, outside grease traps within the District's boundaries and connected to the District's collection system for PCBs on an annual basis. A copy of the analysis will be forwarded to the Food Service Establishment (FSE) once received by the District. If PCBs are found, the District will take immediate steps to discontinue any discharge from the FSE's grease trap until the FSE can provide analytical results that demonstrate that the grease trap has PCB levels of non-detect and PCBs are no longer present. Case-by-case approval for each of these traps is not required.

All FSEs having in-ground, outside grease traps located at FSEs that prepare food for retail sales for direct human consumption on the premises that are located within Spartanburg County but outside of the District's boundaries, and all commercial FSEs preparing food for wholesale/resale distribution that are located within Spartanburg County within or outside of the District's boundaries, are required to provide to the District on an annual basis laboratory reports and chain-of-custody records from a SCDHEC certified laboratory to document that the grease trap contents have no PCB contamination. This requirement also applies to those FSEs located within the District's boundaries but NOT connected to the District's collection system. The laboratory reports and all other required paperwork must be presented prior to discharging these grease loads at the Fairforest Reclaimed Water Treatment Facility.

The list below includes all currently approved grease trap locations that are NOT both within the Spartanburg Sanitary Sewer District boundaries and connected to the District's collection system. Approval to discharge expires one (1) year from the sample date on the lab report. After this time, the grease trap must be sampled and approved for discharge again. If the location you plan to pump is listed and the expiration date for that location has not passed, you do not need to request approval again. If your location is NOT listed or the expiration date has passed, you must contact Spartanburg Water for approval and provide current PCB testing results.

If you have any question as to whether a given location is approved for discharge, PLEASE contact the District before pumping.
